

THREE PHASE INDUCTION MOTOR
GEARED MOTOR

MODEL **SF-JRGD**

The high performance and wide variations meet all needs

SF-JRGD 5~10HP
(Steel Frame)

- **High Performance Geared Motor,
Applicable to a Wide Range of Industrial Fields**
- **Installation same as GM-D series**
- **IP55 Degrees of Protection**
- **F-Class Insulation**
- **Developed & Made in Thailand,
Gear Set by Mitsubishi Electric FA Industrial Products Corp., Japan**

Introduction

The results of advanced technologies, High-performance geared motor, applicable to a wide range of industrial fields

Geared motor that is indispensable as driving source for FA and exhibit their performance in a wide range of industrial fields, ranging from transportation equipment to food processing equipment. Mitsubishi gear is highly appreciated for their high capabilities, low noise level and compact & durable body that appropriate to the FA age.

Features

Sealing

Hydrodynamic aided rotary shaft lip seals are provided for high-frequency driving to improve sealing quality up to 100 times in comparison with before.

Compact and lightweight

High performance cooling structure of steel motor frame integrated with RGC. (Round-bar Gear Cutting: gear cutting after heat treatment) technology and precision cutting, make the product to be compact and lightweight, suitable for install with limited space machine.

Low noise

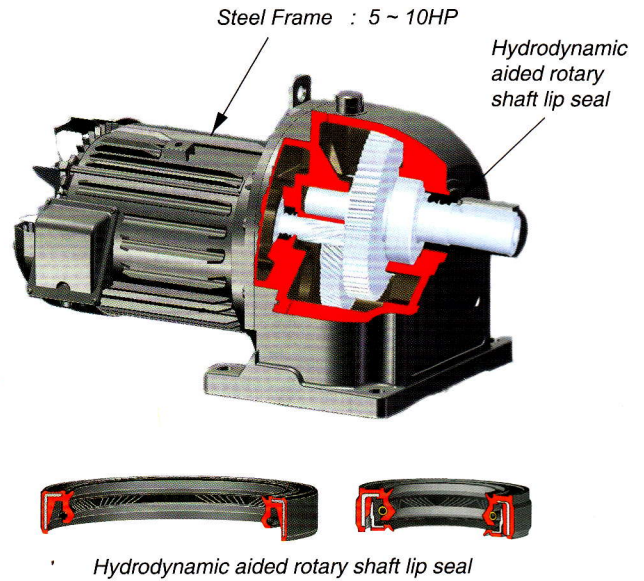

From RGC technology and the precision cutting to pinion gear (1st gear) and 2nd gear grinding, realized to low noise operation.

Ecology

Has no 6 hazardous restricted substances which defined in European RoHS directive.

Easy use

By Tapped shaft end and extremely safe terminal box (terminal base), easier sprocket fix and wiring. Developed grease seal capability by improved construction, dimension and oil seal material.

Lubrication details

- (1) For grease lubrication type, grease is filled from factory. For ambient temperature between -15°C to +40°C, lithium soap grease (extreme pressure) NLGI No.000 is applicable. Grease lubrication type can be installed in universal direction.
- (2) For the oil lubrication type, no filled oil from factory shipment. Select appropriate oil type and quantity by refer to Table 6-7. Before operation, oil level must be above red line on oil level gauge. Do not overfill, doing so can cause to leak or overheat. Allowable inclination for horizontal installation is as shown in Table 8.
